DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Jay F. Moldovanyi, Reg. No. 29,678 on June 12, 2004.

- Cancel claim 3.

Remarks

2. In view of Applicant's arguments in Appeal Brief filed on 2/26/04 and discussions in Appeal Conference held on 6/4/2004, the Examiner withdraws the rejection under 35 U.S.C 103 (a) to claim 2. Therefore, claim 2 (the only remaining claim) is in a condition for allowance.

Allowable Subject Matter

3. Claim 2 is allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not show a stepping motor including a rotor unit having multiple magnetic poles formed on a circumference, alternately with an S pole and an N pole in a circumferential direction wherein magnetic pole width consisting of the S pole and the width of the N pole in each pair are different from each other by a constant electrical angle ranging from 15 degrees to 50 degrees. The most relevant

Art Unit: 2834

prior art is Saji et al. (JP 60043060) directed to a stepping motor wherein the width of an S pole and an N pole of the rotor in a circumferential direction in each pair are different from each other. The purpose of Saji et al. when making irregularities in the pole width is to increase detent torque to stop the rotor when there is no coil excitation. The purpose of the present invention when making irregularities in the pole width is to reducing the cogging torque, therefore, the optimum range discovered by the present is distinguished over prior art.
